INDEPENDENT AUDITORS' REVIEW REPORT TRANSLATED FROM CHINESE

PWCR22000124

To the Board of Directors and Shareholders of Synnex Technology International Corporation

Introduction

We have reviewed the accompanying consolidated balance sheets of Synnex Technology International Corporation and subsidiaries (the "Group") as at June 30, 2022 and 2021, and the related consolidated statements of comprehensive income for the three months and six months then ended, as well as the consolidated statements of changes in equity and of cash flows for the six months then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" as endorsed by the Financial Supervisory Commission. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of review

Except as explained in the following paragraph, we conducted our reviews in accordance with the Statement of Auditing Standards No. 65, "Review of Financial Information Performed by the Independent Auditor of the Entity" in the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for qualified conclusion

As explained in Notes 4(3) and 6(9), the financial statements of certain insignificant consolidated subsidiaries and investments accounted for under the equity method, as well as the amounts included in respect of these subsidiaries and investees and the information disclosed in Note 13, were not reviewed by independent auditors. Total assets of these subsidiaries and the balances of these investments accounted for under the equity method amounted to NT\$33,524,527 thousand and NT\$34,312,362

thousand, constituting 17% and 21% of the consolidated total assets as at June 30, 2022 and 2021, respectively. Total liabilities amounted to NT\$8,451,660 thousand and NT\$4,365,580 thousand, constituting 6% and 4% of the consolidated total liabilities as at June 30, 2022 and 2021, respectively. Net income of these subsidiaries and investments accounted for under the equity method amounted to NT\$815,349 thousand, NT\$1,199,088 thousand, NT\$1,764,542 thousand and NT\$2,107,413 thousand, constituting 33%, 35%, 34% and 35% of the total net income and the balances of recognised investment profit or loss which is adopting equity method for the three months and six months then ended, respectively, and the comprehensive income and the balances of recognised investment profit or loss and other comprehensive income which is adopting equity method amounted to NT\$654,681 thousand, NT\$1,365,194 thousand, NT\$1,590,743 thousand and NT\$2,301,611 thousand, constituting (285%), 58%, 30% and 46% of the consolidated comprehensive income for the three months and six months then ended, respectively.

Qualified conclusion

Except for the adjustments to the financial statements, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries and investments accounted for under the equity method as well as the information disclosed in Note 13 been reviewed by independent auditors as described in the *Basis for qualified conclusion* section above, based on our reviews, nothing has come to our attention that causes us to believe that the accompanying financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as at June 30, 2022 and 2021, and its consolidated financial performance for the three months and six months then ended and its consolidated cash flows for the six months then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, “Interim Financial Reporting” as endorsed by the Financial Supervisory Commission.

SYNNEX TECHNOLOGY INTERNATIONAL CORPORATION AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2022 AND 2021
(EXPRESSED IN THOUSANDS OF NEW TAIWAN DOLLARS,
EXCEPT AS OTHERWISE INDICATED)
(REVIEWED, NOT AUDITED)

1. HISTORY AND ORGANISATION

Synnex Technology International Corporation (the “Company”) was incorporated in 1988 under the provisions of the Company Act of the Republic of China (R.O.C.). The Company and its subsidiaries (collectively referred herein as the “Group”) are primarily engaged in:

- A. Assembly and sale of computers and computer peripherals;
- B. Sale of communication products;
- C. Sale of consumer electronic products;
- D. Sale of electronic products and components;
- E. Warehouse and logistics services; and
- F. Maintenance and technical services for the products mentioned above.

The Company’s shares have been traded on the Taiwan Stock Exchange since December 1995.

2. THE DATE OF AUTHORISATION FOR ISSUANCE OF THE CONSOLIDATED FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORISATION

These consolidated financial statements were reported to the Board of Directors on August 4, 2022.

3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRS”) as endorsed by the Financial Supervisory Commission (“FSC”)

New standards, interpretations and amendments endorsed by the FSC effective from 2022 are as follows:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective date by International Accounting Standards Board</u>
Amendments to IFRS 3, ‘Reference to the conceptual framework’	January 1, 2022
Amendments to IAS 16, ‘Property, plant and equipment: proceeds before intended use’	January 1, 2022
Amendments to IAS 37, ‘Onerous contracts – cost of fulfilling a contract’	January 1, 2022
Annual improvements to IFRS Standards 2018-2020	January 1, 2022

The above standards and interpretations have no significant impact to the Group’s consolidated financial condition and consolidated financial performance based on the Group’s assessment.

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments endorsed by the FSC effective from 2023 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IAS 1, 'Disclosure of accounting policies'	January 1, 2023
Amendments to IAS 8, 'Definition of accounting estimates'	January 1, 2023
Amendments to IAS 12, 'Deferred tax related to assets and liabilities arising from a single transaction'	January 1, 2023

The above standards and interpretations have no significant impact to the Group's consolidated financial condition and consolidated financial performance based on the Group's assessment.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture'	To be determined by International Accounting Standards Board
IFRS 17, 'Insurance contracts'	January 1, 2023
Amendments to IFRS 17, 'Insurance contracts'	January 1, 2023
Amendment to IFRS 17, 'Initial application of IFRS 17 and IFRS 9 – comparative information'	January 1, 2023
Amendments to IAS 1, 'Classification of liabilities as current or non-current'	January 1, 2023

The above standards and interpretations have no significant impact to the Group's consolidated financial condition and consolidated financial performance based on the Group's assessment.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Accounting Standard 34, 'Interim financial reporting' as endorsed by the FSC.

(2) Basis of preparation

- A. Except for the following items, these consolidated financial statements have been prepared under the historical cost convention:
- (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
 - (b) Financial assets and liabilities at fair value through other comprehensive income.
 - (c) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.
- B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the "IFRSs") requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

- A. Basis for preparation of consolidated financial statements:
- (a) All subsidiaries are included in the Group's consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.
 - (b) Inter-Group transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
 - (c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
 - (d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.
 - (e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive income in relation to the subsidiary are reclassified to profit or loss on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or losses previously recognised in other comprehensive income in relation to the subsidiary

should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

B. Subsidiaries included in the consolidated financial statements:

Note 1: The financial statements of the entity as of and for the six months ended June 30, 2022 and 2021 were not reviewed by the independent auditors as the entity did not meet the definition of a significant subsidiary.

Note 2: The financial statements of the entity as of and for the six months ended June 30, 2021 were not reviewed by the independent auditors as the entity did not meet the definition of a significant subsidiary.

Note 3: The Company's subsidiary – Laser Computer (China) Ltd. cancelled its registration on October 6, 2021.

Note 4: The above subsidiaries included in the consolidated financial statements as of and for the year ended December 31, 2021 were audited by the Company's auditors, apart from Fortune Ideal Ltd. and Golden Thinking Ltd., which were audited by other auditors.

C. Subsidiaries not included in the consolidated financial statements: None.

D. Adjustments for subsidiaries with different balance sheet dates: None.

E. Significant restrictions: None.

F. Subsidiaries that have non-controlling interests that are material to the Group: None.

(4) Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in New Taiwan dollars, which is the Company's functional and the Group's presentation currency.

A. Foreign currency transactions and balances

(a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise.

(b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.

(c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-

monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.

- (d) All foreign exchange gains and losses are presented in the statement of comprehensive income within 'other gains and losses'.

B. Translation of foreign operations

- (a) The operating results and financial position of all the group entities and associates that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
 - i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
 - ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and
 - iii. All resulting exchange differences are recognised in other comprehensive income.
- (b) When the foreign operation partially disposed of or sold is an associate, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, even when the Group retains partial interest in the former foreign associate after losing significant influence over the former foreign associate, such transactions should be accounted for as disposal of all interest in the foreign operation.
- (c) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(5) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
 - (a) Assets arising from operating activities that are expected to be realised, or are intended to be sold or consumed within the normal operating cycle;
 - (b) Assets held mainly for trading purposes;
 - (c) Assets that are expected to be realised within twelve months from the balance sheet date;
 - (d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than twelve months after the balance sheet date.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
 - (a) Liabilities that are expected to be settled within the normal operating cycle;
 - (b) Liabilities arising mainly from trading activities;
 - (c) Liabilities that are to be settled within twelve months from the balance sheet date;
 - (d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(6) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that

meet the definition above and are held for the purpose of meeting short-term cash commitments in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortised cost or fair value through other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value and recognises the transaction costs in profit or loss. The Group subsequently measures the financial assets at fair value and recognises the gain or loss in profit or loss.
- D. The Group recognises the dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(8) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. The Group subsequently measures the financial assets at fair value. The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investments. Dividends are recognised as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(9) Financial assets at amortised cost

- A. Financial assets at amortised cost are those that meet all of the following criteria:
 - (a) The objective of the Group's business model is achieved by collecting contractual cash flows.
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortised cost are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognised in profit or loss when the asset is derecognised or impaired.
- D. The Group's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(10) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(11) Impairment of financial assets

For financial assets at amortised cost and lease receivables, at each reporting date, the Group recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognizes the impairment provision for lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognises the impairment provision for lifetime ECLs.

(12) Derecognition of financial assets

The Group derecognises a financial asset when one of the following conditions is met:

- A. The contractual rights to receive the cash flows from the financial asset expire.
- B. The contractual rights to receive cash flows of the financial asset have been transferred and the Group has transferred substantially all risks and rewards of ownership of the financial asset.
- C. The contractual rights to receive cash flows of the financial asset have been transferred; however, the Group has not retained control of the financial asset.

(13) Leasing arrangements (lessor) – lease receivables/operating leases

- A. Based on the terms of a lease contract, a lease is classified as a finance lease if the lessee assumes substantially all the risks and rewards incidental to ownership of the leased asset.
 - (a) At commencement of the lease term, the lessor should record a finance lease in the balance sheet as ‘lease receivables’ at an amount equal to the net investment in the lease (including initial direct costs). The difference between gross lease receivable and the present value of the receivable is recognised as ‘unearned finance income of finance lease’.
 - (b) The lessor should allocate finance income over the lease term based on a systematic and rational basis reflecting a constant periodic rate of return on the lessor’s net investment in the finance lease.
 - (c) Lease payments (excluding costs for services) during the lease term are applied against the gross investment in the lease to reduce both the principal and the unearned finance income.
- B. Lease income from an operating lease (net of any incentives given to the lessee) is recognised in profit or loss on a straight-line basis over the lease term.

(14) Inventories

- A. Cost of inventory purchases includes purchasing price, import taxes and all the related costs involved in the process of obtaining inventory. Discounts, allowances and etc. shall be deducted from the cost of inventory purchases.
- B. Inventories are stated at the lower of cost and net realisable value. Cost is determined using the moving-average method. The item-by-item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs necessary to make the sale.

(15) Investments accounted for using equity method / associates

- A. Associates are all entities over which the Group has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognised at cost.
- B. The Group’s share of its associates’ post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Group’s share of losses in an associate equals or

- exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.
- C. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Group's ownership percentage of the associate, the Group recognises change in ownership interests in the associate in 'capital surplus' in proportion to its ownership.
 - D. Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
 - E. In the case that an associate issues new shares and the Group does not subscribe or acquire new shares proportionately, which results in a change in the Group's ownership percentage of the associate but maintains significant influence on the associate, then 'capital surplus' and 'investments accounted for under the equity method' shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Group's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.
 - F. Upon loss of significant influence over an associate, the Group remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognised in profit or loss.
 - G. When the Group disposes of its investment in an associate and loses significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss on the same basis as would be required if the relevant assets or liabilities were disposed of. If it retains significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.
 - H. When the Group disposes of its investment in an associate and loses significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss. If it retains significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss proportionately.

(16) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalised.
- B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
- C. Land is not depreciated. Other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each part of an item of property, plant, and equipment with a cost that is significant in relation to the total cost of the item must be depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if

appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change.

The estimated useful lives of property, plant and equipment are as follows:

Buildings and structures	20 - 50 years
Utilities equipment	7 - 15 years
Computer equipment	3 - 7 years
Transportation equipment	10 years
Furniture and fixtures	5 years
Tools	5 - 20 years
Leasehold improvements	3 years

(17) Leasing arrangements (lessee) – right-of-use assets/lease liabilities

A. Leases are recognised as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Group. For short-term leases or leases of low-value assets, lease payments are recognised as an expense on a straight-line basis over the lease term.

B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments are comprised of fixed payments, less any lease incentives receivable.

The Group subsequently measures the lease liability at amortised cost using the interest method and recognises interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognised as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

C. At the commencement date, the right-of-use asset is stated at cost comprising the following:

- (a) The amount of the initial measurement of lease liability; and
- (b) Any lease payments made at or before the commencement date.

The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term. When the lease liability is remeasured, the amount of remeasurement is recognised as an adjustment to the right-of-use asset.

D. For lease modifications that decrease the scope of the lease, the lessee shall decrease the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease and recognise the difference from remeasured lease liability in profit or loss.

(18) Investment property

An investment property is stated initially at its cost and measured subsequently using the cost model. Except for land, investment property is depreciated on a straight-line basis over its estimated useful life. The estimated useful lives of investment property are as follows:

Buildings and structures	20 - 50 years
Utilities equipment	7 - 15 years

(19) Intangible assets

A. Computer software

Computer software is stated at cost and amortised on a straight-line basis over its estimated useful life of 3 to 7 years.

B. Goodwill

Goodwill arises in a business combination accounted for by applying the acquisition method.

(20) Impairment of non-financial assets

A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognizing impairment loss for an asset in prior years no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.

B. The recoverable amount of goodwill is evaluated periodically. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. Impairment loss of goodwill previously recognised in profit or loss shall not be reversed in the following years.

C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(21) Borrowings

Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(22) Notes and accounts payable

A. Accounts payable are liabilities for purchases of goods or services and notes payable are those resulting from operating and non-operating activities.

B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(23) Financial liabilities at fair value through profit or loss

A. Financial liabilities at fair value through profit or loss. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss at initial recognition:

(a) Hybrid (combined) contracts; or

(b) They eliminate or significantly reduce a measurement or recognition inconsistency; or

(c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.

B. At initial recognition, the Group measures the financial liabilities at fair value. All related

transaction costs are recognised in profit or loss. The Group subsequently measures these financial liabilities at fair value with any gain or loss recognised in profit or loss.

(24) Derecognition of financial liabilities

A financial liability is derecognised when the obligation specified in the contract is either discharged or cancelled or expires.

(25) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(26) Non-hedging and embedded derivatives

Non-hedging derivatives are initially recognised at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognised in profit or loss.

(27) Provisions

Warranties provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Warranties provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognised as interest expense.

(28) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expense when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of government bonds (at the balance sheet date) of a currency and term consistent with the currency and term of the employment benefit obligations.

ii. Remeasurements arising on defined benefit plans are recognised in other comprehensive

income in the period in which they arise and recorded as retained earnings.

- iii. Past service costs are recognised immediately in profit or loss.
- iv. Pension cost for the interim period is calculated on a year-to-date basis by using the pension cost rate derived from the actuarial valuation at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant curtailments, settlements, or other significant one-off events. Also, the related information is disclosed accordingly.

C. Termination benefits

Termination benefits are employee benefits provided in exchange for the termination of employment as a result from either the Group's decision to terminate an employee's employment before the normal retirement date, or an employee's decision to accept an offer of redundancy benefits in exchange for the termination of employment. The Group recognises expense as it can no longer withdraw an offer of termination benefits or as it recognises relating restructuring costs, whichever is earlier. Benefits that are expected to be due more than 12 months after balance sheet date shall be discounted to their present value.

D. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognised as expenses and liabilities, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the subsequently resolved distributed amounts and the estimated amounts is accounted for as changes in estimates. If employee compensation is paid by shares, the Group calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(29) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Group and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C. Deferred tax is recognised, using the balance sheet method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated balance sheet. However, the deferred tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.
- D. Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. At each balance sheet date, unrecognised and recognised deferred tax assets are reassessed.

- E. Current income tax assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.
- F. A deferred tax asset shall be recognised for the carryforward of unused tax credits resulting from equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilised.
- G. The interim period income tax expense is recognised based on the estimated average annual effective income tax rate expected for the full financial year applied to the pretax income of the interim period, and the related information is disclosed accordingly.
- H. If a change in tax rate is enacted or substantively enacted in an interim period, the Group recognises the effect of the change immediately in the interim period in which the change occurs. The effect of the change on items recognised outside profit or loss is recognised in other comprehensive income or equity while the effect of the change on items recognised in profit or loss is recognised in profit or loss.

(30) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.

(31) Dividends

Cash dividends were recorded as liabilities in the Company's financial statements after the special resolution of the Board of Directors in accordance with Article 240 of Company Act and Articles of Incorporation. Stock dividends are recorded as stock dividends to be distributed when they are resolved by the Company's shareholders and are reclassified to ordinary shares on the effective date of new shares issuance.

(32) Revenue recognition

A. Sales of goods

- (a) The Group sells information, communication, electronic and consumer electronic products. Sales are recognised when control of the products has transferred, being when the products are delivered to the customer. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied.
- (b) Revenue from these sales is recognised based on the price specified in the contract, net of the estimated sales return, volume discounts, sales discounts and allowances. The estimated volume discounts, sales discounts and allowances given to customers are based on the expected purchase volume and accumulated experience. A refund liability is recognised for expected sales return, volume discounts, sales discounts and allowances payable to customers in relation to sales made until the end of the reporting period. Revenue is only recognised to the extent that it is highly probable that a significant reversal will not occur. The estimation is subject to an assessment at each reporting date.
- (c) The Group's obligation to provide a refund for faulty products under the standard warranty terms is recognised as a provision.
- (d) A receivable is recognised when the goods are delivered as this is the point in time that the

consideration is unconditional because only the passage of time is required before the payment is due.

B. Service revenue

The Group provides services of inventory management, installation and maintenance services. Revenue from providing services is recognised in the accounting period in which the services are rendered.

C. Financing components

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the Company does not adjust any of the transaction prices for the time value of money.

(33) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The Group's chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions.

5. CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND KEY SOURCES OF ASSUMPTION UNCERTAINTY

The preparation of these consolidated financial statements requires management to make critical judgements in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year; and the information is addressed below:

(1) Critical judgements in applying the Group's accounting policies

Revenue recognition on a net/gross basis

The Group determines whether the nature of its performance obligation is to provide the specified goods or services itself (i.e. the Group is a principal) or to arrange for the other party to provide those goods or services (i.e. the Group is an agent) based on the transaction model and its economic substance. The Group is a principal if it controls a promised good or service before it transfers the good or service to a customer. The Group recognises revenue at gross amount of consideration to which it expects to be entitled in exchange for those goods or services transferred. The Group is an agent if it does not control a promised good or service before the good or service is transferred to a customer. The Group recognises revenue at the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the other party to provide its goods or services.

Indicators that the Group controls the good or service before it is provided to a customer include the following:

- A. The Group is primarily responsible for the provision of goods or services;
- B. The Group assumes the inventory risk before transferring the specified goods or services to the customer or after transferring control of the goods or services to the customer; and
- C. The Group has discretion in establishing prices for the goods or services.

(2) Critical accounting estimates and assumptions

A. Assessment of allowance for uncollectible accounts receivable

During the assessment process of allowance for uncollectible accounts receivable, the Group has to utilize judgements and estimates to determine the recoverable amount of accounts receivable. The recoverable amount is affected by various factors such as customers' financial conditions, Group's internal credit ratings, historical transaction records, current economic conditions, and other factors that could affect customers' paying ability. If there is a concern regarding the collectability of the account, the Group shall assess the account's collectability individually and recognize appropriate allowances. Management makes critical assumptions and estimates concerning future events as of balance sheet date, which may differ from actual results. Thus, there might be material changes to the assessment.

B. Evaluation of inventories

As inventories are stated at the lower of cost or net realizable value, the Group must determine the net realizable value of inventories on balance sheet date using judgements and estimates. Due to the rapid technology innovation, the Group evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market value on balance sheet date, and writes down the cost of inventories to the net realizable value. Such evaluation of inventories is primarily based on the demand for the products within a specific period in the future. Therefore, there might be material changes to the evaluation.

C. Accrual of inventory purchase rebates

Accrual of inventory purchase rebates is estimated based on contract terms and expected achievement rate. However, contract terms for rebates could be in various types, with complicated calculations and entered into with different counterparties. Therefore, a substantial volume of purchase and sale information has to be matched with individual merchandise item manually in order to calculate rebates. Management makes critical assumptions and estimates concerning future events as of balance sheet date, which may differ from actual results. Thus, there might be material changes to the assessment.

6. DETAILS OF SIGNIFICANT ACCOUNTS

The above ageing analysis was based on past due date.

- B. As of June 30, 2022, December 31, 2021, and June 30, 2021, accounts receivable and notes receivable were all from contracts with customers. And as of January 1, 2021, the balance of receivables from contracts with customers amounted to \$67,492,012.
- C. Details of the Group's accounts receivable pledged to others as collateral are provided in Note 8.
- D. Certain notes receivable that were discounted to banks (pertaining to bankers' acceptance) met the derecognition criteria for financial assets. The Group has payment obligation when the acceptors (acceptance banks) of the notes refuse to pay the notes at maturity. However, the credit rating of the aforesaid acceptors (acceptance banks) is high. In general, the Group does not expect that the acceptors (acceptance banks) of the notes would refuse to pay for the notes at maturity. As of June 30, 2022, December 31, 2021, and June 30, 2021, the Group had derecognized notes receivable (pertaining to bankers' acceptance) that were discounted to banks but not yet matured amounting to \$744,869, \$310,957, and \$2,205, respectively.
- E. Lease receivables
Information relating to lease receivables is provided in Note 6(12).

F. Information relating to credit risk of notes and accounts receivable is provided in Note 12(2).

(6) Transfer of financial assets

Transferred financial assets that are derecognised in their entirety

The Group entered into factoring agreements with banks to sell its accounts receivable. Under the agreements, the Group is not obligated to bear the default risk of the transferred accounts receivable, but is liable for the losses incurred in any business dispute. The Group does not have any continuing involvement in the transferred accounts receivable. Thus, the Group derecognised the factored accounts receivable, and the related information is as follows:

Note 1: The Group is one of the major shareholders of Concentrix Corporation and has significant influence over Concentrix Corporation.

Note 2. The Group was one of the major shareholders of TD Synnex Corporation, and the Group's Chairman Mr. Matthew Miao served as TD Synnex's honorary chairman. Thus, the Group had significant influence over TD Synnex Corporation. The Group lost significant influence over TD Synnex and its ownership decreased to 4.02% due to the issuance of new shares for a merger by TD Synnex on September 1, 2021. On the same date, the Group derecognised the carrying amount of the investment accounted for using equity method, and the investment was remeasured to its fair value and recognised as financial assets at fair value through other comprehensive income. The difference was recognised in gains on disposal of investments amounting to USD 320,651 thousand, equivalent to \$9,017,328.

Note 3. Synnex Corporation announced the change in its company name to TD Synnex Corporation on September 1, 2021.

Note 1: The significant components of buildings include office buildings and warehouse with main buildings and improvements, which are depreciated over 20~55 and 10~35 years, respectively.

Note 2: The Group's property in Nangang District, Taipei City has been under construction since February 2020 and was shown under construction in progress. Thus, for the six months ended June 30, 2022 and 2021, the interest of property, plant and equipment has been capitalized. Amount of borrowing costs for property, plant and equipment capitalised and interest rate range are as follows:

	Three months ended June 30,	
	2022	2021
Amount capitalised	\$ 5,343	\$ 5,167
Range of the interest rates for capitalisation	0.93%~1.04%	0.81%

	Six months ended June 30,	
	2022	2021
Amount capitalised	\$ 10,491	\$ 10,536
Range of the interest rates for capitalisation	0.82%~1.04%	0.81%~0.83%

Note 3: The Group had no property, plant and equipment pledged to others as collateral as of June 30, 2022, December 31, 2021, and June 30, 2021.

(11) Leasing arrangements — lessee

A. The Group leases various assets including land use rights and buildings. Rental contracts are typically made for periods of 1 to 5 years for buildings and 43 to 50 years for land use rights. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose covenants, but leased assets may not be used as security for borrowing purposes.

B. The carrying amount of right-of-use assets and the depreciation charge are as follows:

	Land use rights	Buildings	Total
January 1, 2022	\$ 678,316	\$ 427,338	\$ 1,105,654

D. Apart from the cash outflow relating to the lease expense mentioned above in (11)C, the Group's cash outflow arising from the payment of lease liabilities amounted to \$115,427 and \$124,223 for the six months ended June 30, 2022 and 2021, respectively.

(12) Leasing arrangements – lessor

- A. The Group leases various assets including office buildings. Rental contracts are typically made for periods of 1 to 10 years. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. To protect the lessor's ownership rights on the leased assets, leased assets may not be used as security for borrowing purposes, or a residual value guarantee was required.
- B. The Group leases computers and computer peripherals assets to others under a finance lease. Based on the terms of the lease contract, the ownership of the assets will be transferred to lessees provided that the lessees exercise the purchase option when the leases expire. Information on profit or loss in relation to lease contracts is as follows:

C. Impairment of non-financial assets

Goodwill is allocated to the Group's cash-generating units identified according to operation segment. The recoverable amount of all cash-generating units has been determined based on value-in-use calculations. These calculations use pre-tax cash flow projections based on financial budgets approved by the management covering a five-year period.

The recoverable amount of all cash-generating units calculated using the value-in-use exceeded their carrying amount, so goodwill was not impaired. The key assumptions used for value-in-use calculations are consideration of gross margin, growth rate, and discount rate.

Management determined budgeted gross margin based on past performance and its expectations of market development. The growth rates used are consistent with the forecasts included in market quotation reports and historical experiences. The discount rates used are pre-tax and reflect specific risks relating to the relevant operating segments.

(21) Pensions

A. Defined benefit plans

- (a) The Company and its domestic subsidiaries have a defined benefit pension plan in accordance with the Labor Standards Law. The pension benefits are paid based on the service years and the average monthly salaries of the last 1 month prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions to cover the deficit by next March. The subsidiary, PT. Synnex Metrodata Indonesia, also adopted a defined benefit plan.
- (b) For the aforementioned pension plan, the Group recognised pension costs of \$4,714, \$4,678, \$9,343 and \$9,567 for the three months and six months ended June 30, 2022 and 2021, respectively.

- (c) Expected contributions to the defined benefit pension plans of the Group for the year ending December 31, 2022 amount to \$26,276.
- B. Defined contribution plans
- (a) No pension plan is established for certain overseas investment holding companies since these companies are not required to have an employee pension plan in accordance with the local legislation. Except for the above, other companies have established a funded defined contribution pension plan and therefore contribute monthly a certain percentage of the employees' monthly salaries and wages to the retirement fund. Except for monthly contributions to the retirement fund, these companies have no further obligations.
- (b) The pension costs under defined contribution pension plans of the Group for the three months and six months ended June 30, 2022 and 2021 were \$81,897, \$77,513, \$162,049 and \$157,887, respectively.

(22) Share capital

- A. As of June 30, 2022, the Company's authorised capital was \$24,000,000 (including \$500,000 reserved for the conversion of employees' stock options which have not been issued). The total number of ordinary shares, at \$10 (in dollars) par value per share, issued and outstanding, was 1,667,946,968 shares. Shares yet to be issued can be issued several times by the Board of Directors depending on the demand, and some of them can be distributed in the form of preferred shares. All proceeds from shares issued have been collected.

Movements in the number of the Group's ordinary shares outstanding are as follows:

	2022	2021
At January 1 (At June 30)	1,667,946,968	1,667,946,968

- B. In 1997 and 1999, the Company issued new shares and Mitac Incorporated and other major shareholders offered part of their shares to jointly participate in the issuance of global depository shares (GDSs). These GDSs were issued in Europe, Asia and the USA. Each GDS represents 4 shares of ordinary share. After several issuances of GDSs by issuing new shares, the total number of GDSs outstanding as of June 30, 2022 was 23,174 units, representing 92,708 shares of ordinary share. The main terms and conditions of the GDSs are as follows:
- (a) Voting rights
- The holders of GDSs have no right to directly attend any shareholders' meeting of the Company, vote, or speak. However, when the Depository receives the same instruction from more than 51% of the holders of GDSs on a proposal, the Depository shall vote on the proposal as instructed by the holders of GDSs.
- (b) Conversion of GDSs
- Commencing three months after the initial issuance of GDSs, subject to the terms of the Deposit Agreement and applicable laws of the R.O.C., a holder of GDSs may request the Depository to redeem and deliver or sell the Company's ordinary share represented by the

GDSs.

(c) Dividends

The holders of GDSs are entitled to receive dividends to the same extent as the holders of ordinary shares.

(23) Capital surplus

Pursuant to the R.O.C. Company Act, capital surplus arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Act requires that the amount of capital surplus to be capitalized mentioned above should not exceed 10% of the paid-in capital each year. Capital surplus should not be used to cover accumulated deficit unless the legal reserve is insufficient.

(24) Retained earnings

A. The earnings distribution in accordance with the Articles of Incorporation of the Company is as follows:

- (a) The Company's annual earnings at the end of the accounting year shall be first subject to taxation, reimbursement of previous losses, followed by a 10% provision for legal reserve and provision for or reversal of special reserve by law. If there is profit remaining, the Board of Directors shall propose to distribute the balance amount, together with any accumulated non-distributed profit. Where dividends are distributed in the form of stocks, the distribution shall be subject to the approval of the shareholders at the shareholders' meeting. Where dividends are distributed in the form of cash, the Board of Directors is authorized to make such distribution by approval of more than half of directors present at a meeting where more than two-thirds of the directors are in attendance, and the distribution shall also be reported at the shareholders' meeting.

The Board of Directors shall determine the shareholders' cash dividend ratio with the consideration of the financial structure of the Company, future earnings situation, and business development; however, the cash dividend ratio may not be less than 15% of the total current dividend distributed to shareholders.

- (b) Where the Company incurs no loss, the Board of Directors may draft distribution proposals to distribute part or all of the legal reserve and capital surplus specified in Article 241 of the Company Act to shareholders. Where dividends are distributed in the form of stocks, the distribution shall be subject to the approval of the shareholders at the shareholders' meeting. Where dividends are distributed in the form of cash, the Board of Directors is authorized to make such distribution by approval of more than half of the directors present at the meeting where more than two-thirds of the directors are in attendance, and the distribution shall also be reported at the shareholders' meeting.

B. The appropriation of 2021 and 2020 earnings had been proposed at the Board of Directors' meeting on May 30, 2022 and resolved at the shareholders' meeting on July 20, 2021, respectively. Details are summarized below:

	Years ended December 31,			
	2021		2020	
	Amount	Dividends per share (in dollars)	Amount	Dividends per share (in dollars)
Provision for legal reserve	\$ 1,695,196		\$ 818,064

Cash dividends	8,339,735	\$ 5.00	5,504,225	\$ 3.30

Note: For the year ended December 31, 2020, in accordance with the Company's Articles of Incorporation, the appropriation of cash dividend was authorised by the Board of Directors. Thus, the financial statements reflect the dividends payable. Additionally, the

appropriation of cash dividend has been reflected in the consolidated financial statements as of June 30, 2021 since the resolution of the proposed distribution of earnings for 2020 has reached the statutory threshold for it to be passed through electronic voting of the shareholders' meeting.

C. For information relating to employees' remuneration (bonus) and directors' remuneration, please refer to Note 6(32).

A. In accordance with the Articles of Incorporation of the Company, the Company's net income before tax before deducting remuneration to employees and directors and after covering for losses in the current fiscal year, should be applied to pay remuneration to employees in an amount not exceeding 10% and not less than 0.01% of the balance, and to directors for an amount not more than 1% of the balance. Employee remuneration may be distributed in stock or cash and

directors' remuneration may be distributed in cash subject to a resolution adopted by a majority vote at a meeting of the Board of Directors attended by two-thirds of the total number of directors. Employee remuneration may be distributed in stock; remuneration may also be distributed for employees of controlled or affiliated companies that meet the criteria. The Chairman of the Board is authorized to set such criteria.

- B. For the three months and six months ended June 30, 2022 and 2021, employees' compensation (bonus) was accrued at \$300, \$225, \$600 and \$450, respectively; directors' remuneration was accrued at \$1,975, \$1,875, \$3,950 and \$3,750, respectively. The aforementioned amounts were recognised in salary expenses.

For the six months ended June 30, 2022, the employees' compensation and directors' remuneration were estimated and accrued based on distributable profit of current year as of the end of reporting period.

For 2021, the employees' compensation and directors' remuneration resolved by the Board of Directors amounted to \$2,200 and \$7,900, respectively. The differences between the amounts resolved by the Board of Directors and the amounts of \$2,100 and \$7,500 recognised in the 2021 financial statements had been adjusted in the profit or loss of 2022.

Information about employees' compensation and directors' remuneration of the Company as resolved by the Board of Directors and by shareholders in the meetings is posted in the "Market Observation Post System" at the website of the Taiwan Stock Exchange.

9. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNISED CONTRACT COMMITMENTS

(1) Contingencies

- A. As of June 30, 2022, December 31, 2021, and June 30, 2021, the Group issued promissory notes to guarantee the suppliers' credit limit amounting to \$8,035,346, \$2,180,466, and \$1,819,627, respectively, for inventory purchases.
- B. On November 24, 2015, Kunshan Kunhao Electromechanical Co. Ltd. (Kunhao) filed a lawsuit against Syntech Asia Ltd. (SAL), the Group's indirect wholly-owned subsidiary, in the Hong Kong High Court for breach of oral contract of sales and requested SAL to compensate Kunhao for its losses amounting to USD 2,964 thousand. SAL disagreed with the request and raised an objection in the Hong Kong High Court on February 1, 2016 and requested the Hong Kong High Court to deny the claim of Kunhao. The case was settled for USD 850 thousand on May 31, 2021 and the settlement was paid on June 7, 2021. The case was closed.
- C. On November 13, 2017, Unisplendour Digital (Suzhou) Group Co. Ltd. (Unisplendour Digital) filed a sales dispute against Synnex Distributions (China) Ltd. in Suzhou Xiangcheng People's Court in China. In the complaint, Unisplendour Digital claimed the goods it received were not the subject matter of the contract and requested for a refund of the payment. On January 22, 2018, the Court dismissed the complaint on the ground that the law enforcement has initiated an investigation. In August 2020, Unisplendour Digital continuously refiled complaints to request for compensation of RMB 28,926 thousand, RMB 17,401 thousand, RMB 5,593 thousand and its penalty for breach of contract on the ground that the law enforcement has cancelled the investigation. In March 2022, Suzhou Xiangcheng People's Court in China rendered a judgment that the Company lost the lawsuit in the final appeal. In May 2022, the Company has paid the compensation in full and will apply for judicial remedy, such as filing for retrial, etc.

(2) Commitments

Capital expenditure contracted for at the balance sheet date but not yet incurred is as follows:

	<u>June 30, 2022</u>	<u>December 31, 2021</u>	<u>June 30, 2021</u>
Property, plant and equipment	\$ 2,516,402	\$ 2,599,276	\$ 2,643,938

It refers to the contract commitments of the Group to acquire the property located in Nangang Dist., Taipei City and to build the second stage of the logistics center in Sydney.

10. SIGNIFICANT DISASTER LOSS

None.

11. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE

(1) The Group's subsidiary, Peer Developments Ltd., lost its significant influence over Concentrix Corporation on July 21, 2022 and will change the accounting treatment for the investments in Concentrix Corporation from 'investments accounted for under equity method' to 'financial assets at fair value through other comprehensive income'. According to IFRS, after recognising the one-time-shot gain and related tax accrual, the net unrealized gain is about NT\$6.7 billion. The gain is estimated based on the evaluation of fair market value, not based on real disposal.

(2) In line with the adjustment of the Group's internal organisational structure, on August 4, 2022, the Board of Directors of the Company resolved to directly invest in the following investee companies that were originally indirectly invested by the Company. As the transaction was an intra-group reorganisation, it was accounted for using the book value method.

A. Plan to sell 50% of shares of the Indonesian subsidiary, PT. Synnex Metrodata Indonesia, which were held by the Company's indirect wholly-owned subsidiary, King's Eye Investments Ltd., to the Company.

B. Plan to sell 24.13% of shares of the India investee company, Redington (India) Ltd., which were held by the Company's indirect wholly-owned subsidiary, Synnex Mauritius Ltd., to the Company.

12. OTHERS

(1) Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt. The Group monitors capital on the basis of the net borrowing ratio. This ratio is calculated as net borrowings divided by shareholders' equity. Net borrowings are calculated as all amounts of short-term borrowings, short-term notes and bills payable, and long-term borrowings less all amounts of cash and cash equivalents, financial products at fair value

through profit or loss, and time deposits maturing over three months as shown in the consolidated balance sheet. Shareholders' equity is calculated as total equity as shown in the consolidated balance sheet.

The net borrowing ratios as of June 30, 2022, December 31, 2021, and June 30, 2021 were 106%, 88%, and 67%, respectively.

B. Financial risk management policies

- (a) The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. To minimize potential adverse effects on the financial performance of the Group, foreign exchange forward contracts are used to hedge certain exchange rate risk.
- (b) Risk management is carried out by a central treasury department (Group treasury) under policies approved by the Board of Directors. Group treasury identifies, evaluates, and hedges financial risks in close co-operation with the Group's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative and non-derivative financial instruments, and investment of excess liquidity.

C. Significant financial risks and degrees of financial risks

(a) Market risk

Foreign exchange risk

- i. The Group operates internationally and is exposed to foreign exchange risk arising from the transactions of the Company and its subsidiaries used in various functional currency, primarily with respect to the USD and RMB. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities.
- ii. Management has set up a policy to require group companies to manage their foreign exchange risk against their functional currency. The companies are required to hedge their entire foreign exchange risk exposure with the Group treasury.
- iii. The Group hedges foreign exchange risk by using foreign exchange forward contracts. However, these contracts are not accounted for under hedge accounting. The contracts are recorded as financial assets or liabilities at fair value through profit or loss. Please refer to Note 6(2).

iv. The Group's businesses involve some non-functional currency operations (the Company's and certain subsidiaries' functional currency: NTD; other certain subsidiaries' functional currency: RMB, USD and AUD). The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

Price risk

- i. The Group's equity instruments, which are exposed to price risk, are the held financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. To manage the price risk arising from investments in equity instruments, the Group diversifies its portfolio in accordance with the limits set by the Group.

- ii. The Group primarily invests in equity instruments issued by domestic and foreign companies. The prices of equity instruments would be affected by the uncertainty of the future value of underlying investments. If the prices of these equity instruments had increased/decreased by 1% with all other variables held constant, post-tax profit for the six months ended June 30, 2022 and 2021 would have increased/decreased by \$7,903 and \$38,016, respectively, as a result of gains/losses on equity instruments at fair value through profit or loss. Other components of equity would have increased/decreased by \$160,716 and \$61,662, respectively, as a result of gains/losses from equity instruments at fair value through other comprehensive income.

Cash flow and fair value interest rate risk

- i. The Group's interest rate risk arises mainly from short-term borrowings with variable rates, which expose the Group to cash flow interest rate risk. During the six months ended June 30, 2022 and 2021, the Group's borrowings at variable rate were mainly denominated in NTD, USD, and AUD.
- ii. The Group's borrowings are measured at amortised cost. The borrowings are periodically contractually repriced and to that extent are also exposed to the risk of future changes in market interest rates.
- iii. If the borrowing interest rates had increased/decreased by 0.25% with all other variables held constant, pre-tax profit for the six months ended June 30, 2022 and 2021 would have decreased/increased by \$179,498 and \$135,930, respectively. The main factor is the changes in interest expense resulting from floating-rate borrowings.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the accounts receivable based on the agreed terms.
- ii. The Group manages their credit risk taking into consideration the entire group's concern. According to the Group's credit policy, the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings. The utilisation of credit limits is regularly monitored.
- iii. If the contract payments were past due over 30 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition after taking into consideration the historical experiences.
- iv. In accordance with historical collections and customers' credit rating levels, the default

occurs when the contract payments are past due over certain periods classified based on the credit rating of customers.

- v. The Group classifies customers' accounts receivable and lease receivables in accordance with credit rating of customer. The Group applies the modified approach using loss rate method to estimate expected credit loss.
- vi. The Group will continue executing the recourse procedures to secure their rights on those defaulted financial assets. The Group wrote-off the financial assets, which cannot be reasonably expected to be recovered, after initiating recourse procedures. However, the Group will continue executing the recourse procedures to secure their rights.
- vii. The Group used the forecastability to adjust historical and timely information to assess the default possibility of notes receivable (including related parties), accounts receivable (including related parties), overdue receivables, and lease receivables. As of June 30, 2022, December 31, 2021, and June 30, 2021, the assessment is as follows:

(c) Liquidity risk

- i. Cash flow forecasting is performed in the operating entities of the Group and aggregated by Group treasury. Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs.
- ii. Surplus cash held by the operating entities over and above balance required for working capital management is transferred to the Group treasury. Group treasury invests surplus cash in interest-bearing demand deposits, time deposits, money market deposits, and marketable securities, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient head-room as determined by the above-mentioned forecasts.
- iii. The Group's derivative and non-derivative financial liabilities are classified into relevant maturity groups based on the remaining period from the balance sheet date to the contractual maturity date. Except for those maturing within a year whose contractual undiscounted cash flows approximate the amounts presented in the balance sheet, the remaining contractual undiscounted cash flows of non-derivative financial liabilities are disclosed in the table below:

Non-derivative financial liabilities:

- iv. The Group does not expect the timing of occurrence of the cash flows estimated through the maturity date analysis will be significantly earlier, nor expect the actual cash flow amount will be significantly different.

(3) Fair value information

A. The different levels in which the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in unlisted stocks and derivative instruments is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's investment in equity instruments without active market is included in Level 3.

B. Fair value information of investment property at cost is provided in Note 6(13).

C. Financial instruments not measured at fair value

The carrying amounts of the Group's financial instruments not measured at fair value (including cash and cash equivalents, notes receivable, accounts receivable (including related parties), other receivables, other non-current assets – refundable deposits, other non-current assets – long-term notes and overdue receivables, financial assets at amortised cost – pledged time deposits, other non-current assets – long-term lease receivables, short-term borrowings, short-term notes and bills payable, notes payable, accounts payable, other payables, long-term borrowings, and other non-current liabilities – guarantee deposits received) are approximate to their fair values.

D. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities is as follows:

- (b) The methods and assumptions the Group used to measure fair value are as follows:
- i. For the instruments the Group used market quoted prices as their fair values (that is, Level 1), listed shares are measured at closing price at the balance sheet date.
 - ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method, or other valuation methods, including calculation by applying model using market information available at the consolidated

balance sheet date.

- iii. When assessing non-standard and low-complexity financial instruments, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.
 - iv. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, such as model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments in the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.
 - v. Forward exchange contracts are usually valued based on the current forward exchange rate.
 - vi. The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.
- E. For the six months ended June 30, 2022 and 2021, there was no transfer between Level 1 and Level 2.

F. The following chart is the movement of Level 3 for the six months ended June 30, 2022 and 2021:

	<u>2022</u>	<u>2021</u>
	<u>Non-derivative equity instrument</u>	<u>Non-derivative equity instrument</u>

At June 30	<u>\$ 4,213,662</u>	<u>\$ 3,987,262</u>

G. For the six months ended June 30, 2022 and 2021, there was no transfer into or out from Level 3.

H. Financial quality management segment is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming

the resource of information is independent, reliable, in line with other resources, and represented as the exercisable price, frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model, and making any other necessary adjustments to the fair value.

- I. The following is the quantitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	<u>Fair value at June 30, 2022</u>	<u>Valuation technique</u>	<u>Significant unobservable input</u>	<u>Range (weighted average)</u>	<u>Relationship of inputs to fair value</u>
Non-derivative equity instrument:					
Unlisted shares	\$ 114,927	Market comparable companies	Discount for lack of marketability	0.7	The higher the discount for lack of marketability, the lower the fair value

Note 1: Fill in the columns the counterparty and relationship if securities are accounted for under the equity method; otherwise leave the columns blank.

Note 2: The general ledger account is 'financial assets at fair value through profit or loss'. Due to adoption of IFRS, valuation gains and losses were recognised, and therefore there was no gain (loss) on disposal.

Note 3: It refers to the effect of exchange rate and gains or losses on valuation.

Major shareholders information

June 30, 2022

Table 10

Name of major shareholders	Shares	
	Number of shares held	Shareholding ratio
Mitac Incorporated	260,521,054	15.61%

Note 1: The major shareholders information was derived from the data that the Company issued common shares (including treasury shares) and preference shares in dematerialised form which were registered and held by the shareholders above 5% on the last operating date of each quarter and was calculated by Taiwan Depository & Clearing Corporation.

The share capital which was recorded in the financial statements may differ from the actual number of shares issued in dematerialised form because of a different calculation basis.

Note 2: If the aforementioned data contains shares which were held in trust by the shareholders, the data disclosed is the settlor's separate account for the fund set by the trustee.

As for the shareholder who reports share equity as an insider whose shareholding ratio is greater than 10% in accordance with Securities and Exchange Act, the shares include the self-owned shares and shares held in trust, and at the same time, the shareholder has the power to decide how to allocate the trust assets.

The information on the reported share equity of insider is provided in the "Market Observation Post System".
