INDEPENDENT AUDITORS' REVIEW REPORT TRANSLATED FROM CHINESE

PWCR26000160

To the Board of Directors and Shareholders of Synnex Technology International Corporation

Introduction

We have reviewed the accompanying consolidated balance sheets of Synnex Technology International Corporation and subsidiaries (the "Group") as at September 30, 2026 and 2025, and the related consolidated statements of comprehensive income for the three months and nine months then ended, as well as the consolidated statements of changes in equity and of cash flows for the nine months then ended, and notes to the consolidated financial statements, including a summary of material accounting policies. Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" that came into effect as endorsed by the Financial Supervisory Commission. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of review

Except as explained in the following paragraph, we conducted our reviews in accordance with the Standard on Review Engagements 2410, "Review of Financial Information Performed by the Independent Auditor of the Entity" of the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for qualified conclusion

As explained in Notes 4(3) and 6(10), the financial statements of certain insignificant consolidated subsidiaries and investments accounted for under the equity method, as well as the amounts included in respect of these subsidiaries and investees and the information, were not reviewed by independent auditors. Total assets of these subsidiaries and the balances of these investments accounted for under the equity method amounted to NT$38,478,319 thousand and NT$31,809,331 thousand, constituting 12% and 15% of the consolidated total assets as at September 30, 2026 and 2025, respectively. Total liabilities amounted to NT$13,077,982 thousand and NT$8,925,351 thousand, constituting 6% and 7% of the consolidated total liabilities as at September 30, 2026 and 2025, respectively. Net income amounted to NT$1,389,214 thousand, NT$834,401 thousand, NT$3,110,361 thousand, and NT$2,432,451 thousand, constituting 28% , 31%, 26% and 40% of the net income and the balances of recognised investment profit or loss which is adopting equity method for the three months and nine months then ended, respectively, and the comprehensive income and the balances of recognised investment profit or loss and other comprehensive income which is adopting equity method amounted to NT$1,409,392 thousand, NT$841,165 thousand, NT$3,119,813 thousand and NT$2,409,721 thousand, constituting 22%, 8%, 16% and 62% of the consolidated comprehensive income for the three months and nine months then ended, respectively.

Qualified conclusion

Except for the adjustments to the financial statements, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries and investments accounted for under the equity method as well as the information been reviewed by independent auditors as described in the *Basis for qualified conclusion* section above, based on our reviews, nothing has come to our attention that causes us to believe that the accompanying financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as at September 30, 2026 and 2025, and its consolidated financial performance for the three months and nine months then ended and its consolidated cash flows for the nine months then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" that came into effect as endorsed by the Financial Supervisory Commission.

4. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Accounting Standard 34, 'Interim financial reporting' that came into effect as endorsed by the FSC.

(2) Basis of preparation

A. Except for the following items, these consolidated financial statements have been prepared under the historical cost convention:

(a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

(b) Financial assets and liabilities at fair value through other comprehensive income.

(c) Defined benefit liabilities recognized based on the net amount of pension fund assets less present value of defined benefit obligation.

B. The preparation of financial statements in conformity with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

A. Basis for preparation of consolidated financial statements:

(a) All subsidiaries are included in the Group's consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.

(b) Inter-company transactions, balances and unrealized gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.

(c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

(d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference

between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity.

(e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognized in profit or loss. All amounts previously recognized in other comprehensive income in relation to the subsidiary are reclassified to profit or loss on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or losses previously recognized in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

Company Act, capital surplus arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Act requires that the amount of capital surplus to be capitalized mentioned above should not exceed 10% of the paid-in capital each year. Capital surplus should not be used to cover accumulated deficit unless the legal reserve is insufficient.

In the complaint, Unisplendour Digital claimed the goods it received were not the subject matter of the contract and requested for a refund of the payment. (1) Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt. The Group monitors capital on the basis of the net borrowing ratio. This ratio is calculated as net borrowings divided by shareholders' equity. Net borrowings are calculated as all amounts of short-term borrowings, short-term notes and bills payable, and long-term borrowings less all amounts of cash and cash equivalents, financial products at fair value through profit or loss, and time deposits maturing over three months as shown in the consolidated balance sheet. Shareholders' equity is calculated as total equity as shown in the consolidated balance sheet.

(b) Risk management is carried out by a central treasury department (Group treasury) under policies approved by the Board of Directors. Group treasury identifies, evaluates, and hedges financial risks in close co-operation with the Group's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative and non-derivative financial instruments, and investment of excess liquidity.

C. Significant financial risks and degrees of financial risks

(a) Market risk

Foreign exchange risk

i. The Group operates internationally and is exposed to foreign exchange risk arising from the transactions of the Company and its subsidiaries used in various functional currency, primarily with respect to the USD and RMB. Foreign exchange risk arises from future commercial transactions and recognized assets and liabilities.

ii. Management has set up a policy to require group companies to manage their foreign exchange risk against their functional currency. The companies are required to hedge their entire foreign exchange risk exposure with the Group treasury.

iii. The Group hedges foreign exchange risk by using foreign exchange forward contracts. However, these contracts are not accounted for under hedge accounting. The contracts are recorded as financial assets or liabilities at fair value through profit or loss. Please refer to Note 6(2).

iv. The Group's businesses involve some non-functional currency operations (the Company's and certain subsidiaries' functional currency: NTD; other certain subsidiaries' functional currency: RMB, USD, HKD and AUD). Price risk

i. The Group's equity instruments, which are exposed to price risk, are the held financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. To manage the price risk arising from investments in equity instruments, the Group diversifies its portfolio in accordance with the limits set by the Group.

ii. The Group primarily invests in equity instruments issued by domestic and foreign companies. The prices of equity instruments would be affected by the uncertainty of the future value of underlying investments. If the prices of these equity instruments had increased/decreased by 1% with all other variables held constant, post-tax profit for the nine months ended September 30, 2026 and 2025 would have increased/decreased by $6,336 and $117,304, respectively, as a result of gains/losses on equity instruments at fair value through profit or loss. Other components of equity would have increased/decreased by $126,014 and $302,516, respectively, as a result of gains/losses from equity instruments at fair value through other comprehensive income.

Cash flow and fair value interest rate risk

i. The Group's interest rate risk arises mainly from short-term borrowings with variable rates, which expose the Group to cash flow interest rate risk. During the nine months ended September 30, 2026 and 2025, the Group's borrowings at variable rate were mainly denominated in NTD, USD, and AUD.

ii. The Group's borrowings are measured at amortized cost. The borrowings are periodically contractually repriced and to that extent are also exposed to the risk of future changes in market interest rates.

iii. If the borrowing interest rates had increased/decreased by 0.25% with all other variables held constant, interest expense for the nine months ended September 30, 2026 and 2025 would have increased/decreased by $191,777 and $140,139, respectively. The main factor is the changes in interest expense resulting from floating-rate borrowings.

(b) Credit risk

i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the notes receivable, accounts receivable (including related parties and lease receivables (expiring within one year)) and overdue receivables based on the agreed terms.

ii. The Group manages their credit risk taking into consideration the entire group's concern. According to the Group's credit policy, the Group is responsible for managing and analyzing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings. The utilization of credit limits is regularly monitored.

iii. If the contract payments were past due over 30 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition after taking into consideration the historical experiences.

iv. In accordance with historical collections and customers' credit rating levels, the default occurs when the contract payments are past due over certain periods classified based on the credit rating of customers.

v. The Group classifies customers' accounts receivable and lease receivables in accordance with credit rating of customer. The Group applies the modified approach using loss rate method to estimate expected credit loss.

vi. The Group will continue executing the recourse procedures to secure their rights on those defaulted financial assets. The Group wrote-off the financial assets, which cannot be reasonably expected to be recovered, after initiating recourse procedures. However, the Group will continue executing the recourse procedures to secure their rights.

vii. The Group used the forward-looking considerations to adjust historical and timely information to assess the default possibility of notes receivable, accounts receivable (including related parties and lease receivables (expiring within one year)) and overdue receivables. The assessment is as follows:

	Group provision	Individual provision				
		Group A	Group B	Group C	Group D	Total

(c) Liquidity risk

i. Cash flow forecasting is performed in the operating entities of the Group and aggregated by Group treasury. Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs.

ii. Surplus cash held by the operating entities over and above balance required for working capital management is transferred to the Group treasury. Group treasury invests surplus cash in interest-bearing demand deposits, time deposits, money market deposits, and marketable securities, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the above-mentioned forecasts.

iii. The Group's derivative and non-derivative financial liabilities are classified into relevant maturity groups based on the remaining period from the balance sheet date to the contractual maturity date. Except for those maturing within a year whose contractual undiscounted cash flows approximate the amounts presented in the balance sheet, the remaining contractual undiscounted cash flows of non-derivative financial liabilities are disclosed in the table below:

(3) Fair value information

A. The different levels in which the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in unlisted stocks and derivative instruments is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's investment in equity instruments and private equity fund investment without active market is included in Level 3.

B. Fair value information of investment property at cost is provided in Note 6(14).

C. Financial instruments not measured at fair value

The carrying amounts of the Group's financial instruments not measured at fair value (including cash and cash equivalents, notes receivable, accounts receivable (including related parties), other receivables, current financial assets at amortized cost, non–current financial assets at amortized cost, other non–current assets-refundable deposits, other non–current assets-long-term notes and overdue receivables, other non–current assets-long-term lease receivables, short–term borrowings, short–term notes and bills payable, notes payable, accounts payable, other payables, other current liabilities–refund liability, long–term borrowings(including current portion), and other non–current liabilities-guarantee deposits received) are approximate to their fair values.

D. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities is as follows:

(b) The methods and assumptions the Group used to measure fair value are as follows:

i. For the instruments the Group used market quoted prices as their fair values (that is, Level 1), listed shares are measured at closing price at the balance sheet date.

ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method, or other valuation methods, including calculation by applying model using market information available at the consolidated balance sheet date.

iii. When assessing non-standard and low-complexity financial instruments, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.

iv. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, such as model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments in the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.

v. Forward exchange contracts are usually valued based on the current forward exchange rate.

vi. The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.

E. For the nine months ended September 30, 2026 and 2025, there was no transfer between Level 1 and Level 2.

F. The following chart is the movement of Level 3 for the nine months ended September 30, 2026 and 2025:

	2026	2025
	Non-derivative equity instrument	Non-derivative equity instrument
At January 1	$ 6,223,663	$ 6,216,699
Gains and losses recognised in profit or loss	(191)	(218)
Gains and losses recognised in other comprehensive income		
Recorded as unrealised (losses) gains on valuation of investments in equity instruments measured at fair value through other comprehensive income	1,893,015	254,350
Acquired in the period	-	24,787
Effect of exchange rate changes	1,894	(3,384)
At September 30	$ 8,118,381	$ 6,492,234

G. Financial quality management segment is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable, in line with other resources, and represented as the exercisable price, frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model, and making any other necessary adjustments to the fair value.

H. The following is the quantitative information of significant unobservable inputs of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value at September 30, 2026	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument:

Total	$ 8,118,381				

	Fair value at December 31, 2025	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value

Unlisted shares	6,253,912	Net asset value	Not applicable	-	Not applicable
Total	$ 6,492,234

(1) General information

The Group operates in the distribution industry and is primarily engaged in the sale of 3C and semiconductor products. Given the characteristics of the industry the Group operates in, the Board of Directors and management team set up operating strategies and allocate resources based on the operating performance of IT/Telecom business and semiconductor business.

(2) Measurement of segment information

The Chief Operating Decision-Maker of the Group evaluates the performance of the operating segments based on the operating profit (loss). This measurement basis includes operating revenue achievement percentage, gross profit achievement percentage, operating income achievement percentage, etc. The Chief Operating Decision-Maker reviews the conditions of overspending or underspending monthly, so as to assess the rationality of resources depletion.
